**Date: 10th May, 2021**

Date	Today's Task	Tomorrow's Task	Roadblocks
5th May	<p>I was asked to give a presentation on how to install the project on a local machine on Windows platform, how the project works, machine learning models that we have used on the project. I have been instructed to transfer the project to BitBucket, so that they can see and work on further development of the project. I have also been assigned to update the GitHub Readme.md file with proper instructions of installing and running the project on a local machine and how to deploy it.</p> <p>And other team members were instructed to install the project on a Linux environment and were also asked to write instructions for that.</p>	Write instructions for GitHub and BitBucket.	None
